The Format for the Meta-Coaching System
Team Leaders' Daily Schedule
Review and Feedback on Day 8

V: Team Leaders Benchmarks
1) Demonstrating Meta-Coaching Skills
2) Observing and interacting with participants
3) Benchmarking the coaching skills of participants on the Core Coaching Skills
4) Collaborating as a team member.
5) Leading and coaching a team
6) Evaluating self performance
7) Assuming responsibility for self
8) Confronts difficulties quickly and effectively

Part I:

ASSIST TEAM TRAINING

1) Welcome and Introduction to Team Leaders Training Day
Thank you for your commitment to the Meta-Coaching System and to this training! I appreciate your passion and commitment in devoting your time and energy as do the other Meta-Coach Trainers. You make Meta-Coaching work as it does. Let's begin with introductions and hear your personal challenges and stretches

Why are you here? What competency do you want to work on this week?
What is your next level of development in knowledge, skill, and/or achievements.
What was the very best thing that you received from your Meta-Coaching?

Our Commitment to You —

To support you in your coaching skills, leadership skills, benchmarking skills.
To provide a context for you to practice leading and coaching a group to become a team.
To build a team together among all of us.
To become a faculty of those most skilled in MC.

2) Preparation for your first meeting with your Group.

Your 40 minutes with your team on Day 1.
Roles and responsibilities.

3) Training in Benchmarking Skills.

3 or 4 Coaching Sessions of 30 minutes; benchmarking and checking to see how much we are on the same page. 3 or 4 of you will coach today and be benchmarked: who? 3 or 4 will get a coaching session, who? What will you work on? Problem, interference, new potential to unleash.

4) Training in Leading and Coaching the Coaching Skill Drills.

ASSIST TEAM TESTING

Do you know what Meta-Coaching is?

_____
_____
_____

Who does the work of Coaching? _____

What does the Coach do? What is his/ her work? _____

What are the processes that the Coach facilitates? _____
_____
_____

What are the basic Conversations? _____
_____

What is the purpose or design of the WFO Questions? _____
_____

How does a Meta-Coach use the WFO Questions _____
in Coaching? _____

What are the key Coaching Categories inherent within
the WFO Questions? _____
_____
_____

What is the key skill in Coaching? The most important one? _____
Why? _____

What stops most people from effective listening? _____
_____

THE IDEAL ASSIST TEAM

***A Bit of History**:* In 2005, Michelle and I decided to raise the bar for the Assist Team at Module III of the Meta-Coach Trainings— *Coaching Mastery*. Until then, while we had some tremendous people with really big hearts on the teams, we had not been satisfied with the overall performance of the teams. So as we have re-thought the quality of people we needed for the Leadership Team, we realized that we needed to make specific *who* we were looking for. And obviously, we wanted people who would model the spirit and passion of coaching, people who would be excellent role models, and people who would truly add to the quality of Meta-Coaching and who would let themselves be challenged and stretched at the training (and not pretend that they were perfect and were the world's "experts").

Each year since then we have typically had more people volunteer than we could use. And we have turned away people. If you are not chosen for this year, please receive whatever feedback we offer as a gift in order to move to the place where you will be ready and able to contribute next year. During 2006 and 2007 we have seen that this approach indeed created much better team *leaders* with the result that the participants have experienced a much richer experience.

The Criteria:

1) Coaching Practice:

Do you have a coaching practice and seeing 10 people a week and making a living by it?
Are you a good role model of coaching so that if people follow your example?
Are you running a successful coaching practice financially?

2) Coaching Methodology

Can you coach at the ACMC level of 2.5 consistently and regularly?
Can you run a team and assist by *coaching,* that is, by asking questions and not giving advice, telling, consulting, teaching, training, etc.?
Can you stay focused on details? (Shift to detail meta-program, and meta-detail.)
Can you stay focused on supporting the team and working as a team member? (matching for sameness, cooperation)
Can you stay focused on coaching and not get distracted (your coaching genius state)?

3) Benchmarking

Can you think and speak in terms of structure and form? (not get lost in details)
Do you know the benchmarks of the 7 Core Coaching skills inside out?
Will you learn the benchmarks of the 7 Core Coaching skills inside-out by the training?

4) Knowledge

Are you thoroughly knowledgeable about the 8 models of Meta-Coaching?
Are you knowledgeable about the Axes of Change? Do you know those benchmarks?
Do you have a Master Prac. certification in NLP? (Not required but highly desirable.)
What percentage did you get on the checklist: *Gauging Your Coaching Skills:* [If you have not completed it, please do and do so in ruthlessly honesty with yourself.]

5) Meta-Coach in Good Standing

One small benefit of being on the Team – you get next year's MCF fee paid!

DESCRIPTION OF LEADING A TEAM

What's involved in *assisting* as a leader and coach of a learning team at *Coaching Mastery*?

In the *Meta-Coaching System,* we use small groups of 5 to 7 participants as a *learning team*. This means that ***leading and coaching*** **these teams is your primary task as a Team Leader.** With Meta-Coach training, our aim is to be rigorous in holding and raising the standards.

- There will be one Team Leader/Coach for every 5 to 7 participants.
- You will be engaged in two functions, i.e., coaching and leading the group and moving the group to become a *team.*
- * *You are responsible for the team knowing and understanding what they are to do!* You communicate repeatedly what the Trainers say in the front and help your team members understand what that means— for their coaching, team work, projects, etc. If you do not know or unsure— *ask!!*
- You will want to acquaint yourself with the meta-programs of the participants in your group so that you can be effective with them.
- You will be devoting 100 hours to Group and Team Coaching.
- Prior to Coaching Mastery for ACMC you will receive 2 full days of training in group coaching and benchmarking coaching skills.
- You will be authorized to be the Team Leader/Coach and the paradox and challenge will be that you will lead via coaching. You will not be training, so don't train, *coach!*
- You will be asked to create a sense of safety and support to get closeness in the group for their learning and experience. It will be up to you to create an atmosphere of safety, fun and openness.
- Your objectives is to facilitate the competence of the coaching skills in your team, to keep everyone involved, and to demonstrate a high quality of Meta-Coaching.
- You will give an Encouragement to Commission the whole group on Graduation night. It is *up to you that your team understands that their role that night is to present themselves and do only do that.*
- * Your team is your primary responsibility— spend time with them, give them directions, support them, connect with them, be available and approachable to them.

Vision for the Assist Team

In the *Meta-Coaching System* we use Team Leaders/Coaches as a way to provide an expanded *faculty* of skilled Meta-Coaches. To that end we ask that the group is made up of *leaders*—people actually engaged in coaching and leading in their own businesses. This enables us to create a team of knowledgeable, skilled, and professional people who will convey the spirit and attitude of Neuro-Semantics Training.

Being invited to be a part of this Team means you are becoming a part of a select group of *the Meta-Coach Faculty*. We are choosing those who are willing and able to demonstrate the principles that we teach and who can be, or learn how to be, a good *team player.*

Believing that we can do much more together than individually, our aim is to *create a collegial relationship between us* and to help groom the future leaders of Neuro-Semantics. Our vision is that together we will *live* Neuro-Semantics in *our relationships with each other*. This is one of the most important things we can do to promote Neuro-Semantics. You come as *our valued colleagues* and to be our colleagues in this training. We want you to *be our eyes and ears* during the training in order to insure the quality of the training by your own modeling of the best states and attitudes. We want you to demonstrate in your coaching and assisting your own creativity, flexibility, and team spirit.

At the beginning of this training, the participants will be especially looking to you for guidance and direction. By your place as a Team Leader/Coach, we believe that you have the skills and attitude that can provide that direction. We believe that you have enough self-initiative and ownership of your own resources that you can make a transformative difference. We believe that when there is new material being presented, you can receive such, apply to self even as you listen to it, and be ready to move into a coaching role in the exercises.

A key thing we want for you is that you *have lots of fun,* help us make the learning environment fun, a safe learning context, one in which the participants will be encouraged to experiment and grow. Neuro-Semantics and Meta-Coaching is not about being right, it's about continuously learning, discovering, and improving to unleash our own potentials.

Our hope is that you will personally receive a lot from this training, things that support your own transformation. You will get lots of experiences with new patterns and processes that we will introduce and hands-on practice with what you already know. Often your experience will enable you to ask the kind of questions that facilitate the development of the participants, so keeping that in mind, do feel free to enrich the times we entertain questions and do "Open Frames" for the group.

In Neuro-Semantics one of our key presupposition is, "When you get serious, you get stupid." So be sure to have lots of fun, make lots of new friends, practice your NLP skills, and apply everything you can to yourself. Your own openness, vulnerability, playfulness, and go for it attitude will go a great way to making this a great training.

ACCEPTANCE AS A TEAM LEADER

Congratulations—you are on the Team! You are a part of the Team at Coaching Mastery and one of the ***Meta-Coach Training Faculty members.*** You are one of the few who have earned the right to this place of leadership and it is that—*a place of leadership.* So to prepare you for what will happen, the requirements of the role, the criteria we have put in place, and the challenges that we will be presenting to you, I have put these pages together as a resource for you in terms of group coaching and leadership.

As a member of the Assist Team you will have two key responsibilities:

1) *Leadership* in the Group and Team Coaching of a team. This is perhaps the most critical role in the Meta-Coach Training System—one that can make or break the training. What you will get from this is *experience* (and lots of it!) in group/team coaching (and a certificate for that), but even more so— *experience in leadership.* To that end, we want to prepare and coach you via this paper and during the training in leadership.

2) One or two *logistical responsibilities* which will be part of creating a smooth running and successful training. What you will get from this is the advanced responsibility and skill of both task and relationship management.

Your Two Major Objectives with the Groups

Your primary job to supervise, lead, and manage your group of coaches-in-training to create the environment in your group to enable them to become engaged with the processes, the learnings, the group experiences, and to feel supported. Our criteria for you will be that you build trust, inspire responsibility, and evoke a team spirit.

As a leader, you will be (1) directive and task-oriented at times, giving instructions, setting forth the structure and criteria of Meta-Coaching and (2) then at other times you will be supportive, caring, praising, and emotionally involved. These two forms of leadership will depend upon the situation, your skills and style, and your group.

1) Group Tasks:

There will be some tasks for you to accomplish with your group. One key task is to get everybody up to speed on *the coaching skills* and *content knowledge*. We want you to make it your goal to create a high performance team and to enable and empower your team so that they get the learnings and integrate them well into themselves. At times we will also give your team some performance tasks. The design is to put them under pressure to test their coping skills and to develop even more robust skills.

As a leader, we have invested you with the *position authority* to guide, lead, and coach your team. You will be ehlping the trainers determine the provisions each participant will need to complete for certification. We will be depending on your evaluation and judgment call and we will be working with you to get specific persons up to speed as much as possible. We need you to scope out those who will need help from day one and let us know.

2) Group Relationships:

Your mission is to work with your *group* so that they become a *"team."* We want to see the develop a supportive team spirit, contribute their gifts and skills to the team, feel cared for, valued, and supported. Ultimately, Neuro-Semantics and Meta-Coaching is all about *relationship.*

As a leader of the team, we cannot give you the necessary *personal authority* to win the hearts and minds of your group. You will have to do that and that falls back to your attitude, confidence, skills, and personal presence and interaction with your group. *You* will be leading out in showing your group *how* to benchmark each other as you will be doing it to them first. This demands that you know the benchmarks and have developed your own coaching skills in *giving feedback* effectively —personally, warmly, kindly, toughly, firmly, behaviorally, with confidence, with respect, etc.

What's Your Leadership Style?

- Are you a leader? Do you think of yourself as a leader?
- Are you more directive and task-oriented or more democratic, permissive, and people-oriented?
- Which is your strength and orientation and which is your weaker orientation?
- How much flexibility do you have to move between task and relationship?

Are you dressing like a leader? Do you look like a professional coach? Is your demeanor such that they could pick up on that? As you coach and lead your team, use the roles in the Axes of Change— Challenging to Awakener, Prober to Provoker, Co-creator to Actualizer, and Reinforcer to Tester. These will be your leadership roles—confronting, giving feedback, reinforcing small approximations, challenging, etc. In the larger group, lead out by asking questions for your group and empower them to ask higher quality questions. Celebrate with your group and challenge them to celebrate with each other in the larger group.

Feedback from Teams (2009-2010)

The feedback we have received recently has emphasized that people want ***more leadership*** *from their team leaders.* They want the leaders to define their roles more clearly. So as team leader, repeatedly do that, give directions via questions, and make sure that anyone who misses some time is brought up to speed about that's happening. The feedback we almost always get is that the teams want their leaders to *be leaders and be more involved, more engaged with them!*

WHAT DO YOU GET OUT OF IT?

Obviously, you have the opportunity to fully re-experience *the Meta-Coaching System*. This will enrich your knowledge and skill base, especially as you experience it from a meta-perspective.

- *A Meta Re-Visiting.* You already know a lot of the *content.* Now you will deepen and enrich your understanding of that content in these 10 days. This will consist of a re-visit for you and it will give you more than merely a revisit.

- *Structural Learning.* You have the opportunity to experience *Coaching Mastery* at the structural level. This was almost impossible when you first experienced Meta-Coaching. There was too much content, too much focus on the core competencies and reaching benchmark. But now you can truly step back and see the structure, the form of coaching and begin to really grasp its essence— its core.

- *Take Notes.* Even though I've experienced Meta-Coaching many times, every time I learn more. I take notes after the coaching sessions about what I learn. This enables me to keep learning about how various questions, statements, and responses elicit responses in clients.

- *Group Coaching.* You also get to expand the core competencies of coaching from coaching an individual to coaching a group and working simultaneously with a collection of minds—and seeking to coach them for a collaboration.

- *The Feedback Skill.* What you will especially learn and experience is the receiving and the giving of feedback. Your skills in these areas will be developed as you set and receive information from coach, client, and meta-person and then give feedback to all three in the triads.

- *Benchmarking.* To benchmark a coaching session requires that you learn and practice the giving / receiving feedback skills.
  - *Receiving:* To look deeply into a session, see its structure, flow, theme, to hear specific words, themes, patterns, tones. To track and detect patterns, to calibrate states.
  - *Giving:* To coach the person by mirroring back what you saw and heard, to do so with rapport so *you are warm, personable, caring, confirming, and validating.* Being succinct (to the point, brief, short), confrontative (pulling no punches, being candid and straightforward), and systemic (relating everything to the outcome, holistically treating the client as a whole person).

Coaching Mastery Checklist

Things we will need to have ready *before the training begins:*

Pre-ACMC Training Days:
__ Feedback form for Days 2-4. *Well-Formed Outcome form.*
__ Feedback form for Days 5 to 7. *The Change Coaching Form.*
— Room for the Assist Team — Dinner together.
__ Manuals for the Assist Team.
__ A copy of page 19 in this manual for each member of each team.

Day 1:
__ *Evaluation Form* for Trainers, Sponsors, Venue during Coaching Mastery:
    __ **Days 1-4:** Pass out first one on Day 2 (morning) collect on Day 4 and use during the meeting at the end of day 4 with the Assist Team. They can look at the feedback from their team and then make adjustments as needed.
    __ **Days 5-8:** Pass out second one on Day 5 (morning), collect as entrance to Graduation (Day 8)— it is the ticket to the Graduation.
__ *Charts* for the walls:
    __ Questions: "The Parking Lot" — *park* questions here.
    __ Celebrations: To someone *specifically* about something *specific.*
__ *Name Tags:*
    — Different color of tags for Participants and for Team Leaders: Team leaders will collect the name tags each night and give them out in the mornings.

Day 3:
__ *Basket and a ball* for the Feedback Demo. The ball should be just a bit smaller than the basket so that it is a challenge. Ideally, a Use Soccer Ball.
__ Printer:

Day 5 and 6:
__ Projector and Camera and Projector:
    __ Show Graham Richard's 2011 video, day 5 (option).
    __ Video tape the Coaching session (Days 6)
    __ Play back on evening of Day 6.

— Certificates and Pre-Certification Records:
    Team Leaders will be filling out the Pre-Certification Records along the way. Make sure the Team Leaders have them on Day 2.

Day 8:
__ Copy of the Meta-Coach **License** (3 pages).
__ Preparations for the Graduation: finger foods, drinks, wine, etc.

Part II:
YOU AND YOUR TEAM

WHEN YOU FIRST MEET YOUR GROUP

One of the most critical moment for your leadership are *the first moments* when you meet your group on Day 1. What state will you be in? What would be your best state for enabling the individuals to feel comfortable with you, to trust you as a confident leader, to become more ready for the adventure, etc.? It's critical that you begin by setting the frames that will guide and lead the group. The frames you set will establish the direction, style, and expectations.

Here are 7 things to communicate to your team. Take these words, make them your own and be ready to deliver them on Day 1 in the second hour. [Written with "I" as if one team leader, use "we" if there are two team leaders.]

1) Match their state. (1 minute)

[Pacing] "Well, here we are! Are you nervous? Who is a bit anxious about everything you've heard this morning so far? Who's excited? I felt a lot that way my first time through Meta-Coaching. Who's wondering, "What have I got myself into?" Who's worried about making the grade?

2) Your Leadership Role and their Buy-In (2 minutes):

I (We) have been designated your Team Leader and my (our) commitment to you is to support each and every one of you through the training processes, the coaching labs, and the group projects. Is that okay with you? Good. The standards are high and rigorous. Think of Meta-Coaching not hard as it is *challenging*—it is for those who want to be challenged to be their best. Do you know that? My (Our) job is to not only help each of you individually, but to coach you as a team so that all of us on this team can help each other. Is everybody here willing to do that? I know that many of you come here as leaders already—and that be challenging for you to take a non-leadership role. You may feel out-of-place, disoriented, uncomfortable. Is that true for any of you? [hands] How well do you know that every great leader is simultaneously a great follower?

> Notice the structure: statement– question.
>
> Make a statement—Ask a Question.

3) Feedback and Accountability (2 minutes):

At the end of these 8 days *you* are going to evaluate my (our) skills as a team leader and give me (us) personal feedback how I (we) can be a better group coach. So I (we) need your help. The other side of things is that I am (we are) here to be the eyes and ears of

the trainers and to evaluate each of you in terms of your readiness for assessment. I (we) will be benchmarking your coaching skills. So as we get started, two questions for you:

1) Will you give me (us) permission to *lead you as a team so* that I (we) can do the best I (we) can at this task? [Yes]

2) Will you help all of us in this team become the best supportive learning team possible? [Yes]

4) Time Keeping (1 minutes):

Thank you. I appreciate that. As group leader I'm responsible for being the *time-keeper,* so there will be times when I will interrupt you and give you a 1 minute or 30 second cue. My time-keeping signal is _____ and my "time-out" signal is _____.

5) Intensity of the Training (3 minutes):

Do you know why?
Why do we use pressure, stress, and demanding performance?

This training is going to be *intense.* This is intentional. For some of you, it may become very, very intense. That's why as this group becomes a truly supportive team—we will have the ability to help each other. Among the pressures and intensity:

- Information overload: so much to know and use about NLP and NS. Axes of Change, Self-Actualization Quadrants, Matrix Model, etc.
- Time pressures: long hours
- The Challenges: testing, benchmarking, performance.
- The personal nature of coaching itself: dealing with issues, changing.
- The issue of control: the rules of the training, the things we "have to do." How well does that settle as an independent adult?
- If you have a "reflective" learning style— you will have to find time to *reflect* after hours ... that is not part of this training!

6) Self-Disclosure and invitation for each participant to disclose Self (3 minutes each, 6 and you (7) so 21 minutes):

As we get started, I will tell you about myself —coaching focus, business, practice, NLP and NS background, and 2 of my personal goals for this week, then we will go around and have each of you do the same.

A) If someone overtalks: interrupt, set boundaries, give feedback.
B) If someone has lots of questions: defer to question time, Parking Lot.
C) If someone begins to lecture, teach: note, comment on it, mirror back, interrupt.
D) if someone is too quiet: mirror back, invite to share.

7) Invitation for co-creating the Norming (remaining minutes):

We have been asked to move from being a "group" to being a "team." That's one of my tasks this week, to lead and coach you — us— in becoming a team. So, how can we help each other reach certification, accelerate our learning and skill development, and have lots of fun??

TEAM LEADERS' TASKS

As Leaders of your teams and when you benchmark of all participants, you serve as our eyes and ears.

1) Keeping Track of your Team

Foremost: Who is in your team, how are they doing, where are they at, what do they need? When are they present? When are they gone? How much are they learning, participating, etc.? At the end, how close is any given participant to sitting for assessment?

Keep a Record of your team members: Scores, strengths, next steps, meta-programs, accountability for time and practice.

- Are you spending enough time with each member of the team?
- Are you providing enough guidance?
- Do you know what each is working on? Skills they are developing?
- How are they handling the stresses and pressures?

2) Identifying the meta-programs in each of your group members.

While your team members are more than their meta-programs, their meta-programs *drive* their strengths and weaknesses. As you learn to identify specific behaviors and language that indicate their meta-programs, you may at times when you think it appropriate call their attention to them. For example, you may say something like,

> "Jane, let me invite you to do a step back with me for just a moment. As you expressed that, Are you aware of the meta-program you are now demonstrating?"

Once you do that you will want to explain as the team leader and team coach what you are doing. "From time to time, I will be *bringing awareness* to you, to your expressions, to the group, and to the experience at that moment of your patterns and meta-programs. My intention will be to be a mirror in real-time so as to expand your meta-program filter. Do I have your permission to do this? Can we all have fun and enjoy this growing / developing process?"

- Are you now filtering globally or specifically? Suppose you shifted to the other side?
- Are you matching right now or mis-matching? How is that impacting things?
- Are you now internally referencing or externally? What state are you in as you do that?
- Is your attention on your Self or the Other right now? How does that feel?
- Are you In-time or out-of-time (through-time) as you experienced that?

3) Feedback at the end of the program.

As most of you will have already know, we are continually evolving, refining, and enhancing the Meta-Coach Training *content, logistics,* and *assist team processes.* As you go through this particular MC training, you will be in a meta-position, possibly for the first time, possibly for several times. You will no doubt see many new things that work well and see opportunities for improvement. Yet we ask that *during* the training itself you *sort for sameness* by matching for the criteria that we have set forth rather than for differences. Seek to match the logistics and team processes for the "unseen" dynamics

of the frames that we have set.

4) Sitting for Assessment:

We are asking you to pick 2 or 3 participants to be their ongoing supervisor and mentor until they complete their competency assessment. Keep in touch to check when they are ready to do the assessment and receive the Certificate.

5) Group Coaching Skills and Leadership Skills

You have the opportunity to practice two sets of skills: leading and coaching. How effective will you be in leading and coaching the group to become a team?

On Day 8 at the end of the training the Assist Team as a whole will review at lunch time your feedback and learnings. What insights have you gained? Experience? Skills? Next steps? We will also explore as time allows your ideas for improving the logistics of the training.

In your teams, you will have some participants that will test you by complaining about the structure, processes, and design of the training (especially the trainers and perfectionists!). Your job is to match the system design and help them discover and realize its value. It will not be to your benefit or theirs if you "sympathize" with them in such a way that you encourage their dissatisfaction. As a leader, that will be one of the critical points where you will be called upon to lead them to follow the MC System as it is today.

6) Leading the Group Projects

You will have two (2) projects to lead with your group: the Skills project and a Comedy Skit. *These are **your** projects.* You are completely responsible for them. How they go and the final project is **a reflection on you!** It is not your place to *give it away to the group.* It is your place to lead and coach them to do a great job. If at any time you do not understand an assignment or project—ask the trainer/s. It is your responsibility to *clearly communicate the requirements to your team.*

Feedback from the Assist Team Director *(*If there is someone for this role*)

Our design on the MC trainings is to have an *Assist Team Director* who will typically *not* have a team to lead. The director's responsibility is to direct you in your role by mentoring and coaching. This person will also be responsible for directing all of the logistical tasks of the training. He or she will be charged with offering you feedback throughout and at the end of the training for your ongoing development as a coach and leader. Remember, you are *not* a trainer, you are a coach. Your team reflects your ability to bring that group together as a team.

LOGISTICAL ROLE DESCRIPTIONS

The following are the job and role descriptions for the logistics of the training. Each Assist Team Leader will have one or two of these roles to play.

1) Registration

- 1 or 2 persons to register each person at start of the training, welcoming and framing their participation in the training.
- A master list of names will be provided with the dates for tracking attendance for each day. On the first day participants will receive a manual and name tag. Daily attendance will be tracked and monitored.

Name Tags

- We collect the name tags at lunch, dinner, and at the end of the day. Each Team Leader will collect the name tags of the team. This gives you a chance to make contact with your team several times every day. It enables you to know who is present and who is not.

Flip charts

- At the end of each session (primarily during breaks), a group of flip charts identified by the Trainers will be taken down and attached to the walls of the training room.
- The flip charts will be put up in a way to indicate the progression of the presentation so that a person could follow the themes around the room.
- Ensure each morning that there's enough flip chart paper for the day. Prepare flip chart paper.

Room Tidiness

- At the end of each session (during breaks) or during a group process, tidying the room, paying special attention to removing coffee, tea, and water cups, straightening the chairs, removing extra chairs added to the main body.
- Count chairs and put only the amount of chairs as there are participants in the room, including Team Leaders who also sit in the main body.
- Ensure that before each exercise, there are chairs set up for 2 or 3 persons.

Venue Communicator

- This is the person who is to be the sole communicator with the Venue contact for all food, beverage, etc. Typically this person will be a staff member of the Organizing Sponsor.
- *Temperature:* The temperature of the room will be set at (68f or 18c) and not changed by anyone except for the Venue Communicator.
- *Door noise:* If the training room door is noisy and self-locking, the door is to be taped open so that it does not make noise when people enter and leave the room.

Music and Sound and ***Time Keeper***

The music and sound person will be the *master time keeper* for the training—keeping track of each break and exercise, and will be responsible for cuing the *call back music* at the end of a break or exercise. We typically select and use music to compliment the training sessions and participation. The music that's required for the MC Training include the following:

1) Call back song: High energy popular song.

2) Writing music: soft background music that suggests creativity.
3) Exercise music: upbeat, creative.
4) Break music: contemporary, light, fun.
5) Induction music: relaxing, for visualization.

- *Microphone batteries* will need to be changed each morning before the start.
- *Music* will be pre-selected each day in conjunction with the Trainers. The music will need to be cued and ready to go so that there are few sound "gaps."
- *Mic-runners:* When a trainings is being recorded, ensure that the participants who are asking questions are speaking into a microphone.

Team Leaders

- *Participant attendance*: To keep track of each member of your team, tracking when they leave the room during the main sessions, their return, and returning on time from breaks. If any participants miss more than 1 hour of the training, their Certification will automatically become *provisional* and they will have to make up that time.
- *Fun*: You are charged with the most audacious responsibility of making this training one of the most playful and fun experiences that you can have and that you can invite your team to have.
- *Team Meeting #2:* The training hours are from 9 am to 9 pm. You will be required to be present for the daily Assist Team Meeting at 8:15 each morning (8:15 to 8:45).
- *Team Meeting #2:* There will be another 30 to 40 minute Assist Team meeting each day between 6:15 and 6:45. We conclude the sessions each evening at 6 pm.; this gives participants an hour to kick back, eat, get ready for the evening session. At that time we will meet and have Dinner together. The dinner will be arranged each evening for the Assist Team; typically this will be a light meal.
- The evening sessions are from 7 pm and conclude at 9 pm.
- *Knowledge and skill base:* To ensure that you have studied all 7 of the Core Coaching Skills benchmarks and that you are familiar with the Assist Team Benchmarks.
- *Clothing:* Bring professional clothing and layers to accommodate the temperature in the training room.

Shadowing: MC Trainer Internship

If there is a Meta-Coach who has already been a team leader at least once and who is also a Licensed Neuro-Semantic Trainer, he or she may be at the training to *shadow* the Meta-Coach Trainer or Trainers. Shadowing involves closing following every activity in the training, tracking the activities, identifying frames, processes, transitions, and talking through the structure with the Trainer. Those who are shadowing will often be asked to co-lead various parts of the training.

The Internship for becoming a **Meta-Coach Trainer** is a three-year process.
1) Licensed as a Neuro-Semantic Trainer and Meta-Coach - ACMC & PCMC.
2) Certificate as an Assist Team Leader: 2 to 3 times on the team.
3) Shadowing a Meta-Coach Trainer at Module III.
4) Meet the Neuro-Semantic Leadership Criteria.
5) Sponsor and Co-Train Module III.
6) Sign off of Prerequisites.
7) Signing the Meta-Coach Trainer Contract.

TEAM LEADER AGREEMENT

The following is the *Agreement* between yourself as a Team Leader and the Meta-Coach Trainer or Trainers. Please read carefully, ask any questions that you need to and then sign and date the agreement.

___ I will follow and keep to the schedule and processes of the Meta-Coach Training System.
___ I will follow the daily instructions in the Leader Team meeting each morning and evening.
___ I will asking questions if I don't understand what I'm supposed to do.
___ I will use questions in coaching and leading my team (rather than teaching, lecturing, training, etc.).
___ I will bring 3 written KPIs statements with me to the Training Day prior to *Coaching Mastery* for what I want to gain from the training as a Meta-Coach and/or Team Leader.
___ I will be on time and keep my group on time during the training.
___ I will give a Commission to the graduates at the Graduation Ceremony.
___ I will get my ego out of the way as I work with my team and with the rest of the Leadership Team.
___ I will facilitate the development of my group through the group-development stages (forming, storming, norming, and performing) so they will become a team.
___ I will coach my team on their performance of the Benchmarking Project.
___ I will spend 15 minutes with each member of my team sometime during the training.
___ I will be actively involved with my group as a Coach.
___ I will follow the lead and guidance of the Meta-Coach Trainer/s.

TIPS ON LEADING

1) Communicate. Communicate. Communicate.

Keep framing and framing again the structure, intent, and purpose of the training. Don't assume that saying something one time means everybody heard it! There will be some frames that you will want to set again and again with your team. Set your frames 10 times!

Be succinct: brief, get to the point, avoid repeating yourself several times.

2) Connect. Connect. Connect.

Keep connecting, relating, talking, engaging. They need you! They are looking to you for information, knowledge, ideas, support, care. Provide it. *Keep asking: How do you need support from me?*

3) Coach— Refuse to be seduced into other roles.

Choose the questions you answer. Some questions are best answered in the small team; some in the larger group. Refer questions to the Parking Lot, to the Panel. Coach as you answer questions. Don't be seduced into become a Professor or Lecturer.

4) For ongoing feedback — Record what's happening in and out of the Group.

Throughout the training, in your group, in the coaching triads, and in the training room things will happen. People will say and do things and you may need to repeat to the leadership team what you see and hear. So keep some paper with you so you can write notes about what is said and done.

On the morning of Day 8 you will spend 40 with your team leading group feedback on how the group functioned as a group over the 8 days and receiving feedback about your leading and coaching of the group. **Take notes** as people offer you feedback; we will talk about such at the Team Leaders meeting that evening.

5) Orient your team to the Structures of the Training.

Take the *Score Sheet* with you to the team each day and help them to know where they are on reaching competency level. Be sure to clearly define your role and do repeat from time to time. Check on your group from time to time: is everybody clear about their role? What role are they playing? What role could they be playing? How is the group functioning? Communicating? Involving everybody?

6) Calibrate!

Keep calibrating each day to each person's states and ego-strength. How is each person doing? How are their states? Energy level? Ability to receive feedback? Participating in the group? What needs to be put on the table? What needs to be mirrored back?

7) Take time to spend time with each team member.

Aim to spend 15 minutes to talk with each member, give them a personal touch with your time and spirit. Perhaps eat lunch with some of them. When you check in, make it clear that it is not just "chatting" but you are doing so in your role as Group Coach and Group Leader. During Days 2 through 4, try to benchmark all of the members of your team. That will give you more insight about each person.

8) Develop your own Style for wearing the Coach and Leader hats.

Which are you best at? Least effect at? Play with the interchange of the two hats with your group. When engaged in the projects, lead about the structure of the project and coach about the actual doing of the project. Don't do it for your team! Get involved as fully as you can. It is also your project.

9) Developing your Style for Group Coaching.

How will you name your team, create team rituals, bond with your group, work through conflicts, etc.? How will you support and challenge your group? Build up rapport and trust with your group—and then challenge them! Lead by directing through asking questions. Keep exploring with your group.

From time to time invite your team to step back, to take a Meta-Moment to reflect on itself. What roles are each of us playing? How are we doing? How could we do better?

10) Stay on top of the Problems that Arise.

Keep current and don't let problems go for long and fester. If someone leaves the group, debrief that with the group. If someone gets rigid, defensive, judgmental, deal with that immediately and with the group. Model effective confrontation skills.

GROUP COACHING QUESTIONS

The Psychological Nature of Groups

There are 7 questions *in the back of the mind* which we all ask when we enter into a new group. Address these questions as the group coach so people will participate in healthy ways and so the groups is healthy and effective.

Questions *People experience they enter into a new group*	**Factors**	**Description** *Coaching / Leading Requirements*	**Problems & Challenges** for Groups and Teams
1) Is it safe?	**1) Safe** **2) Open** **3) Flexible**	Group is safe enough for people to be vulnerable, truthful, honest, Real, candid, to confront. Handle change *Have I made it safe? How can I?* Can adapt, open conflict, Self-awareness, disclosure *Are we flexible? Can we be direct?*	Fears, threatening, posturing positions, rigid, closed, playing games, inauthentic.
2) Am I included?	**4) Inclusion**	Welcomed, accepted, invited in, Supported	rejected, criticized, disdain, Left-out, excluded.
3) Will I have some influence?	**5) Empowering**	Control, a voice, make a difference Competent, response-able, energy. Self-determination.	Controlled, ordered, rules, Resistance, Bureaucracy Feels dead.
4) Do I count?	**6) Creates Significance** **7) Respectful**	Personal Significance, feel important, sense of honor, esteem, valued.	Disrespect, humiliation, Insult.
5) Will I have fun? Will it be emotionally satisfying? Can I be me? Can I be authentic?	**8) Emotional Connection** **9) Likeability**	Liked, like, fun, bonding, friend-ship, compatible, nurturing. Self-aware.	Dislike, endured, impersonal
6) Can we work together?	10) **Team spirit** **11) Teamwork**	Cooperate, collaborate, team spirit.	Incompatibly, in-fighting, the ego is in the way.
7) Can we bring out the best in each other for peak performance?	**12) Facilitating Potential in all**	Facilitating self-actualization in all members of other team.	Holding people down; not seeing or speaking to the potential of the people.

Group Checklist:

The factors play a role in our experience in this group. What do you believe about how you will handle a group? How much energy, spirit, thought, emotion will you invest in the group? How do you believe you will you be treated? Low (0) to high (5)

1B) Openness:

__ I feel open and aware.
__ I feel safe with the group.
__ I know myself and I know others.
__ I see that information and decisions are open.

Safety:

__ I don't have to be right.

2) Inclusion:

__ I feel included, a part of the group.
__ I feel alive.
__ I feel stimulated in the group.
__ There's a role for me to play and contribute.

3) Control:

__ I feel in control of myself.
__ I feel I have influence with others in the group (determining procedures).
__ I feel responsible for my part.
__ I feel accountable and able to hold others accountable.
__ I feel that I can contribute to the decision making.
__ I feel there is a distribution of power and control.

Competent:

__ I feel able to handle the group, conversation, discussions, decisions.
__ I feel strong enough to reveal a weakness.
__ I feel competent to take risks and be open.

4) Significant:

__ I feel significant, respected, and honored.
__ I feel seen and appreciated for myself.

5) Likability:

__ I feel liked.
__ I like myself.
__ I like others in the group.

6) Team spirit and teamwork

7) Performance

__ I am more creative and whole within the group than alone.
__ The group stretches me so I discover new potentials.
__ We are able to be more creative, more intelligent together than alone.

CRITERIA FOR COACHING
A GREAT TEAM

Your task is to take a mixed group of people who don't know each other and have little to no connection and turn them into a team, a high performing team. You will be asked to deal with their meta-programs and differences, and to invite them through the group dynamics of team building. Re-acquaint yourself with the materials in the Meta-Coaching TM about Group and Team Coaching.

Criteria for an Excellent Team:

1) *Cohesiveness.* Create a cohesive team: build up a consensus of your people.

2) *Facilitation:* Facilitate the group processes without doing them for them and without instructing them about how to do them. It's not about teaching and training, about giving advice, it is about *coaching* them as a group so they become a team.

3) *Engagement:* Actively involved in coaching and giving feedback. Confronting what's happening and empowering the group to deal with it.

4) *Punctuality:* Being punctual. You are responsible for keeping the time. When you hear that you have 15 minutes in your groups, mark your watch and get the group back on time. Coach the group to handle its tasks in a timely manner.

5) *Healthy Self-Care:* Take care of yourself. Get the rest and food that you need that will enable you to be a good model of a well-balanced coach. This will be a very intense week and you will be putting in extremely long hours.

6) *Fun and joy:* Coach the team so that they have lots of fun and massive pleasure in the process. If you get serious, you will get stupid. If your team gets serious, the team will get stupid.

7) *Effectiveness:* You will be evaluated for how well your team performs, coach your group to become a high performing team.

PREPARING YOUR MOMENT OF INSPIRATION

You are to prepare a 1-to-2 minute *Moment of Inspiration* at the Graduation. The design is to inspire the participants, this becomes your departing frame for the participants. Use a poem, inspirational quotation, story, etc and make *one point*—a point that will be memorable and significant for the new Meta-Coaches.

Inspiration — What is it?

Inspiration is not instruction, information, advice, commands, or training. So it is not addressed to the mind, but to the heart— to a person's spirit. It involves something cognitive, an idea, yet that idea is designed to stimulate hope, encouragement, resilience, persistence, etc. *Inspiration* is designed to activate the heart, to feel a value, to mobilize a strong inner spirit toward a goal or way of living. What is inspiring is semantically significant.

- *Inspiration* is therefore from heart to heart. And it focuses on things that are uniquely human. So tell a story, quote from an important person, state something as a bullet point. *Inspiration* make the heart leap ... it induces motivational states (hope, desire, commitment, determination, etc.).
- What is your point? Limit it to *one point.*

How will you Develop your Inspirational Structure?

- Build up to a crescendo. Build suspense.
- Put together a sequence of words, ideas, actions, etc. that builds up to a meaningful story.
- Present a theme and keep repeating that as a refrain like a chorus in a song.
- Use a thematic structure ...

  We have come this evening to honor your ....
  Imagine a brand new world where ...
  I want to remind you of the human potential of ...
- Start with a *strong engagement.* How will you engage the minds and hearts of your listeners?
  - Question— establish it ... use message to answer it.
  - Startling statement — a surprise.
  - Contrast: Especially use for reframing.
  - Personal Story: Use killer details. Make your words come alive. Put people *into the story so they experience it.*
  - Paradox
  - Imply — let them infer. Let there by some mystery.
  - Poem: read slowly and with articulation. Know the poem thoroughly.
- End with a *strong, memorable close.*
  - Build up to your point— end on a high. State your point.
  - End by planting a question in their mind – let your words ring in their ears.

Potential Ideas for Creating an Inspiration:

Be willing to be challenged
Keep learning, school is never out for the growing person.
Step up to be responsible
To whom much is given, much is required.
Learn to be present; don't miss the moment.
Story; I had a stroke, it changed my life. But you don't need a stroke to wake up!

Key to treasures; you also have a key to open treasures in your mind and heart.
There are potentials in every person. Develop your eyes to see the invisible.
A seed has to die to live; die to old ways, born to new things.
This is not the end, it is the beginning. The journey has just begun.
Problem of success, Rocky story; stay hungry, keep the eye of the tiger.
There is instrumental listening, there is sacred listening.
Resilience: story of Mamoud in Egypt. And you think you have problems?
Be the change you want to see in your world.
Walk carefully and with love in the presence of others. You have powerful tools.
When you build a skyscraper, you need deep foundations.
General contractor building house, ready to retire, tired, skipped details and quality.

The Tantalizing Introduction

The idea is to *design* an introduction for yourself as a *Meta-Coach.*

I'm Michael, I'm a Meta-Coach.

A Meta-Coach?

Yes, My Meta-Coaching specializes in—

[personal, executive, groiup and team, wealth creation, healthy aging, resilience, etc.]

Say what the problem is or not ...

State what the solution is...

I love it! (Or, It's awesome! It's great)

Wealth creation:	True wealth is a rich creative mind; money then follows.
Resilience:	Life inevitably has set backs; resilience is bound and vitality from within.
Healthy Aging:	The body inevitably gets older, but the mind, heart and spirit can stay youthful and energetic.
Personal Coaching:	When you win the inner game; all of the outer games are a cinch!
Group & Team	Even strong self-sufficient people can learn to become great team players.
Executive Coach	Leadership is inside-out; it begins when you can lead yourself effectively with values and vision.

D

Part III:

THE ROLE OF GIVING FEEDBACK AND BENCHMARKING

At the beginning of the Triune:

"I am your benchmarker and your consultant. I will be interrupting you as we focus on *deliberate practice.* My commitment to all three of you is to see and hear as much as I can and feed back the most important in terms of what you are doing very well and what are your next steps to become an effective Coach. You are not here to practice coaching wrong so when things are going wrong I will interrupt, provide some direction. At any time, feel free to stop and consult with me as your supervisor."

Don't let the Coach coach wrong. Gently correct the errors which arise.

At 12 minutes: What kind of a conversation does your client want to have with you? Where are you on the Well-Formed Outcome questions? Where is the client's energy in the Landscape?

At the end of the session — before giving feedback:

"What was the best **skill** that you used in that session? ... What skill or skills did you not use that you know you could have or should have?" "How do you think you ***did*** with your **skills?**"

Design: For the coach to download and begin reflecting on the session.

Follow up questions: Do you know how to do that skill you could have used? How would you do that?

As the Feedback begins:

"Are you ready for some feedback?" Sit and hold your sheet so the person can see it. "I will begin at Supporting and go down through the skills. Starting at 2.5 what I saw and heard was ..."

When you state the score:

"Based on the behaviors that I saw and heard, you seem to be operating at level ..."

To the coach-in-training *at the end of the feedback:*

1) Does this feedback fit for you? How well does this feedback fit for you?

2) What will you take from this laboratory session that will make you a better coach next time?

To the Client *at the end of the laboratory:*

1) “What was the best thing your coach did in that session?”
2) “What could your coach have done that would have made the session better for you?”

GIVING FEEDBACK

There is an art in giving deliberate feedback—

1) Identify the skill being expressed.

Question yourself: Is this being expressed in a competent way?
Is there anything inadequate about it? If so, what?
What is the person missing?

2) Stop after the person has attempted the skill.

Quietly and gently say, “Okay, let’s stop here.” How do you think you just did in X? (Acknowledging, clarity check, etc.). What I noticed was A, B, and C. Do you know what to do to do that well? What? (If it’s good): Okay go for it. (If it is not sufficient): Here’s a suggestion, say “A B C.”

A) Framing: “If you said that to me, I would say. So why are you interrupting me? I still do not know why? What is the purpose?”
B) Acknowledging: “Did you repeat the sentence verbatim?” “Do you need to hear that statement again?”
C) Clarity Check: “Did you get clear on how the client is using that term?”
D) Subject: “So do you know the subject of this conversation yet?” “What is your guess?”

3) Repeat if the person is still not achieving a good expression of the skill. Repeat Step 2. “Take 3.” If the person succeeded, give a thumbs up.

THE CHALLENGE OF BENCHMARKING

1) Thoroughly know the 7 skills — and hundred-plus sub-skills!

Use the "lines" format to learn all of the sub-skills and to familiarize yourself with the feedback form,

2) Think systemically about the 7 core skills.

The skills are inter-related. Listening affects all of them.

Focus on *Level 3 — Competency*: What behaviors indicate competency?

Is there *enough* of these behaviors?

Are these behaviors related to *what the client wants* (client's outcome and KPI)?

Do the behaviors have the necessary *quality* to indicate competency?

Below Level 3 — less than competency, something to work on.

What does the person need to work on?

What will take to next level?

Above Level 3 — Remember, a full Level **3** means the person is *fully competent.* That is the PCMC level! 2.5 is the ACMC level.

So *no "3"* unless the person is so fully competent that there nothing else is needed to be fully at the PCMC level!

Be very strict and rigorous about this.

1) Know how to Score effectively.

2.5 *means* that the person is at certification level and that you are ready to put the mantle of being an ACMC Credentialed Coach on that person and send them out! Would *you* send one of your *loved ones* to that person to be coached? If not, then 2.4 at most! *What* does the person need so that you'd send your loved ones to him or her for coaching?

Quantity: *Is there enough?* For a level "3" we want to see 1 level 3 behavior every minute of Supporting and Listening. 22 in 22 minutes; 30 in 30 minutes. If those relational behaviors are occurring 1 every 2 minutes on average, then 1.5.

Quality: *Weight of the sub-skills.* Each set of sub-skills are listed from lightest to heaviest in terms of the weight of the sub-skill— how much weight it carries for manifesting the skill.

4) Know how to give feedback to the Coach you are benchmarking.

Your frame for the practices: **Do not let the coach practice wrong.** Give a little rope, for a minute or two, then pull the person in to find out what's happening. "Let me interrupt you for a moment, Where are you in the process? Which WFO question are you on? What kind of coaching conversation does your client want to have with you? What's your strategy right now?"

Feedback and consult by asking questions. Demonstrate the coaching approach in how you interact. Do NOT teach. Draw the distinction out of them. "Was that a rhetorical or leading question?" "Did I just hear a judgment?"

Keep your eye on judgments. Sometimes judgments masquerade as a "celebration" or "encourager" as in "good, great, excellent." Or as a "confrontation." The Issue is: By whose standards and criteria are you using the word 'good'?
First days: Eliminate the interferences. First days (2-4) are usually about unlearning, getting rid of the things that are undermining the coaching, bad habits of listening, supporting, questioning, state induction.

Make sure the session is real. Is the client role playing? Or giving something trivial to work on? Give feedback and challenge the client. The goal is for the coach and client to be authentic.

The six levels: 0 -1 -2 -3 -4 -5 **are the conceptual levels** (see *Benchmarking Intangibles*, p. 42).
Zero: opposite of the skill
1 and 2 beginning development; unconscious and conscious incompetence
3 is full competency
3.5 is expertise – person in the zone operating at full expert level.
3.5 on all simultaneously shows mastery. The expertise is no longer dependent upon being in the zone. Can be produced regardless of state of health, context, environment, etc.

The five **behavioral** levels for each skill is the sequence: 0 – 1– 2– 2.5 – 3 and 3.5
2.5 is "good enough" and so the benchmarks for the ACMC *credentials*. *Full* competency develops with practice and experience (PCMC credentials).
3.5 is the top of all of the behaviors – the actions that we can see, hear, detect, etc. at the sensory-based level. When a person begins to do listening at a 3.5 he or she will almost simultaneously be supporting at a 3.5 or questioning. The skill is so integrated into the coach's style that it is hard for the observer to determine if it was listening, questioning, framing, etc. The integration of the skill creates a new level of elegance.

If a person then does all 7 skills at 3.5, we say that the 7 skills "gestalt" into what would be a 4 (Expertise). Here skill and personality or style all combine so that it is all intricately woven together. A person has expertise when he can do the skill when "in the zone." The person has mastery when she can do it at any time or place.

How to Score Your Benchmarks

All of the coaching labs are 25 minutes except the one on Day 6, it is 35 minutes.

Supporting:

For a 2.5, the coach needs **1 mark per minute:** 1 mark for 2.5 and 3 level skills. For 25 minutes, approximately 25 marks. *Approximately* because it could be 20 to 25—the *quality* of the actions *can* count for more than 1 if the coach is doing some truly quality responses. Similarly, the *lack of quality* in the responses can make 25 to 30 less than the 2.5 mark.

For "the basics of rapport" —posture, voice (volume, tone and tempo), and energy, if these are generally matched, 5 marks for them. If there is a mismatch in these basics, then *subtract a tenth-of-a-point* (0.1) from the number of marks.

- *Voice:* Measure in decibels. If 4 (client) and 6 (coach)—difference is 2 so subtract 0.1. If 7 (client) and 6 (coach) the 1 degree of difference is close enough. Do this for *volume, tempo* (speed) and *tone.*
- *Energy:* From 1-10, if difference is more than 2 than subtract 0.1. Energy: forcefulness of movements, speed of movements.
- *Posture:* Use a 1-10 scale and an image of two people dancing, if dancing is "complete matching" of two people in rhythm with each other, then in degrees from 1-10, differences of 2, subtract 0.1. Remember to consider cross-matching, partial matching, appropriateness of matching something. Subtract 0.1 for any *mimicking.*
- *Gestures:* The only "gestures" that count are those that are *semantically loaded or connected.* That is: Gesture + Word(s) = Possible Semantic Gesture/ Space. Count one mark (√) for each one identified and/or used. Subtract 0.1 for each one mis-matched. If simply missed, no need to subtract unless somehow "critical" to the session.

All of this requires a *dialogue*—constant checking with the client about what is being said ("Acknowledgments"). After an acknowledgment, it is perfectly okay to check with a testing question, "Is that right?" An acknowledgment does not count if the coach immediately turns the client's words into a question. An acknowledge needs *a full stop* after the sentence.

Listening:

**** Listening is the key skill in Coaching***, where there is little to no listening to the client, there can be no effective use of supporting, questioning, feedback, induction, framing, etc. *The quality of the coach's listening determines the quality of all of the other skills.*

- *Repeating specific words* is a basic requirement. No need to count these! Notice only if *key words* are *not* mentioned or used. Expect these *until* or *unless* they are missing or they are being paraphrased. Then subtract 0.1 for each paraphrase.
- *Clarity checks:* In 25 minutes, we expect 4 to 7. Underline in red pen (or some color that stands out) every word the client *could have asked* the client about regarding how the client is using that term. For less than 4, subtract 0.1 for each.
- *Things not heard:* In this category which is at level-1, you will record things that

the client says—as he or she says them—which stand out as important and semantically significant. If the coach does not mention it, mark it as one item "not heard." For each one, subtract 0.1 or 0.2 (depending on the semantic weight of what was not heard.)

- *Rephrase:* This is like a paraphrase except it is presented and checked with the client so the client accepts as a better word for describing things. It is conscious whereas paraphrases tend to be unconscious. The coach doesn't even realize he is paraphrasing. The rephrase is a word reframe that is offered: "overwhelm," "so you mean you have lots of things to do."

Under listening, *repeating specific words* is assumed until or unless the coach does not. How can you tell? When the client paraphrases or when the client fails to use some of the client's highly significant terms. Then mark down 0.1 points for each one.

Questioning:

Questioning is *how* we coach and facilitate.

- *WFO Questions:* The first set of questions are the *outcome* questions— what does the client want? Ideally, ask all 18 of the questions, minimally ask 5 to get an outcome that is well-formed: (1) What? (3) Why? (4-6) A Context question? (7) What do you have to do to get what you want? and (6) Ecology? Subtract 0.1 for each of these questions not asked.
- *Checking & Testing:* The coach needs to be interspersing these questions with the WFO questions— 3 of each.
- *Clarity:* Transfer "clarity checks" under Listening; 4 is required.
- *Quality Control Questions:* These are questions that enable a coach to check the congruency of the client's system. The constructs may be ineffective and unuseful for the outside world (i.e., they may not work), but at least they are congruent and fit for the client's inside world.
- Questions for you as benchmarker:
  - Does coach use the initial question?
  - Does coach ask WFO questions in sequence? The more sequential, the better!
  - Does coach hold the outcome frame?
  - Does coach notice when questions are not answered?
  - Does coach repeat question until answered?
  - Does coach ask testing question to confirm?

State Induction

Who is doing the induction? Client or coach? We benchmark the coach! In effective coaching, the coach communicates in a way so that the client *emotionally experiences* the meanings being discussed. What do we want a client to experience? Curiosity, exploration, learning, trust, decision, focused attention, etc. In benchmarking focus on *what the coach is doing that induces,* evokes, and elicits the client's experience. With the states experienced, *who* did the induction– the coach or the client?

Guess what states you think the client experienced— was it reflection, learning, desire, curiosity?

Check the skills used to induce the state, the coach will need at least 4 skills and an

effective use of voice: variation, congruence, etc.

Meta-Question

For each meta-question multiply times 0.2. Include "Inviting awareness" (Listening), include WFO questions 3, 16, 17, and 18. Warning: when the coach asks "what does X mean?" that could be a primary question, a clarity check, or a meta-question. It depends on *how* the coach asks it.

WELL-FORMED OUTCOME QUESTIONS AS A DECISION TREE

As a benchmarker, know all 18 of the WFO questions by heart, be able to use them, and to detect them in a coaching conversation. The more you can facilitate the coaches-in-training to learn these and to learn how to use them— the more effective they will be as Meta-Coaches.

- *Ask* the well-formed outcome questions *sequentially.* Ask them one by one, if *yes* answer, get more details until you have every indication that the person is fully answering *yes.* If *no,* then you have *a problem* as indicated by the third column. Now you have you next *what* (your smaller *what*) to work on.
- So in service of your big *what* (the answer to question #1), answer this smaller *what.* This is *what* is in the way or stopping the next progressive step. How do you handle that what? Look at Column four— this identifies the *Coaching Conversation* that is indicated by the problem and this will be the *solution.*
- Within this solution there are many, many possible *interventions*— hundreds. There are as many interventions as there are patterns in NLP and Neuro-Semantics and in other disciplines. The solution category provides the general category of *Coaching Conversation* that the client needs. Satisfy that and you are ready to move down the list to the next WFO question.

Well-Formed Outcome Questions	**Positive Response** Gives an answer	**Response indicating a Problem** Doesn't know something and so needs to know or do something.	**Coaching Conversation Indicated**
Target: **1)** *What* do you want? Are you stating it in the positive? What does it look and sound like?	Yes, it is stated in the positive and described empirically.	No I don't know what; I need to know and to get clear.	*#1 Clarity* for understanding
3) *Why* do you want that?	Yes, I know the value of this, the benefits I will derive.	No I don't know; I need more energy and motivation to do this.	#1 Clarity *#2 Decision:* Is it important to you? Is it important enough to go after?
Context: **5)** *Where* do you want this?	Yes, I know where this will occur.	No, I don't know. I need more understanding and/or a plan.	#1 Clarity #2 Decision *#3 Plan*
4) *When* do you want this? *When* do you expect to achieve this?	Yes, I know when and have a time-frame for my goal.	No I don't know. I need to know and/or decide on when to plan for this.	#1 Clarity #2 Decision #3 Plan: Develop a time-line and a schedule for it.

6) *With who?* Who is involved? (Relational context)	Yes, I will do my myself; or Yes, I know the persons I need to enlist.	No, I don't know. I need to find a partner, suppliers, customers, etc. I need to develop a collaborative team.	#1 Clarity #2 Decision #3 Plan
Process: **7)** *What do you have to do to get what you want?*	Yes, I know how to do this.	No, I don't know how. I need the how-to knowledge.	#1 Clarity #3 Plan *#4 Experience*
8) Can *you* do this? Start it and sustain it? In your control?	Yes, within my realm of response.	No, it's not within my control. Or it is partly dependent on others to make some response.	#1 Clarity for a new *Target*. *#5 Change* as an adjustment of the current target that is an ill-formed goal as it is.
9) Can You? **10)** Have you? **11)** Steps? Stages?	Yes.	No, I need to discover the actions or know more of the actions that will be required.	#1 Clarity #3 Plan
12) Do you have a *plan* for the steps and stages of the goal?	Yes.	No, I need a plan. I need a strategy.	Plan.
13) Do you have milestones and a way to gather *feedback* to monitor your progress? **14)** Any interference? Anything to stop you?	Yes.	No, need to design a feedback process and identify monitoring system.	#1 Clarity #2 Plan
15) Do you have the internal and external *resources*?	Yes.	No, need resources.	#4 Experience #5 Change *#6 Confrontation*
Criteria Frames: **15)** Do you have the internal and external *resources*? Are you resourceful enough to make this happen?	Yes.	No.	#4 Experience #5 Change *#6 Confrontation*
3) Is it *compelling*? Do you really, really want this? Do you have a big enough *intention* to govern your attentions?	Yes.	No, it's not compelling or not enough. I need to add energy to it so it feels more motivating.	#4 Experience #6 Confrontation
16) Is it *ecological*? Fit into all the areas and *systems* of your life? Is everything within you *aligned* with this? **17)** Have you decided?	Yes.	No, it violates some of my highest values.	#2 Plan #5 Change

18) How will you know that you have reached your goal? What *evidence* will indicate to you to stop?	Yes.	No, don't know how to tell.	Clarity. Decision. Plan.
		.	

Layers of Small *Whats*...
The first what is the most important and the biggest one — *Question #1: What do you want?* That sets the direction, the focus, and the target that you are seeking to hit. Every time you hit a snag in the pathway on to that goal, the bright future that represents— you have a smaller *what.* These whats are revealed by the answer *no* to any of the WFO questions. This gives us the following *smaller whats.*

1) The What of Intentionality. Do you know *what* intentionality is driving you? Is it big enough *why*? Is it strong enough? If not, your first problem is intentionality. Answer Question 3.

2) The What of Context. Do you know the context of your desired outcome? Do you know the *what* of that context? If not, this is the next problem, so answer Questions 4-6.

3) The What of Action. Do you know *what* you have to do and have a well-developed plan for carrying out *what* you need to do? If not, then focus on satisfying Question 7.

4) The What of Responsibility. You? Do you know the *what* of who's problem it is and who can solve it? If not, then you may have an ill-formed goal that you can do nothing about, or only some and it depends on someone else. If to the question "What can you do about it?" the answer is "nothing" or "very little," then this what is a problem and you need to adequately explore and answer Question 8. In your control or influence? 9 (Capacity), 10 (memory) and 11 (steps).

5) The What of Accountability. Do you know *what* you need to have present so that you can measure progress, identify and use milestones along the way, and receive the appropriate feedback that will shape and hone your behavior so you can reach you outcome? If not, then answer Question 12 (Plan) and 13 (Monitor for feedback). 14 (what stops you?).

6) The What of Resources. Do you know *what* you need as either an external resource (time, money, personnel, knowledge, etc.) or internal resources (courage, determination, resilience, knowledge, skill competency, etc.) in order to achieve your desired outcome? If not, then this is part of the Process Questions (7-14) as well as one of the Meta-Frames of Criteria, so answer Question 15.

7) The What of Criteria and Alignment. Do you know *what* will fully satisfy your values, vision, intentionality, mission and identity regarding this goal? If not, then this presents a problem and obstacle blocking your success. Questions 16-18 look at these meta-frames of the values that establish your criteria and standards, so answer Questions 15-18.

8) The What of Evidence. Do you know *what* will be present and what external evidence will occur that will prove to you (and others) that you have succeeded, that you have reached your objective, and that you can stop pursuing the goal and begin enjoying its attainment? If not, then answer Question 18.

GROUNDING A GLOBAL

From La-La Land Back to the Earth

Source: 2009 Meta-Coach Reflections #44
Nov. 25, 2009

As a benchmarker, you have to *detail specifics!* And lots of them. And you also have to do so with the meta-frame in mind. Altogether this means *meta-detailing.*

A *big question* for NLP people (since 60 to 85 % of them are "global" in the USA in terms of the information size meta-program and percentage probably that or more in other countries) is how to unleash their potentials for *detailing* their great, exciting, up-in-the-air visions and dreams. That, in fact, may be *the question* that will enable NLP people to actually *actualize* what they can envision and create in their mind so that it becomes *real* in their everyday lives. Could that be the million-dollar question? Over the years, I have heard these questions scores and scores of times. And a few weeks ago at our *Coaching Mastery* in both New Zealand and South Africa—the big challenge of the day was *"How do you get the globals to come back to earth?"*

The Global Meta-Program Question:

- What do you do with a global person? Is there any hope for him or her?
- Can a global person, who claims that details are totally foreign, learn to perceive details?
- Is it an identity or an excuse when someone says, "But I'm a global, so what do you expect? That's too much detail for me. I'll just get someone else to do that for me; why do I need to do that?"
- Shall we put that person on a crash-diet of Details or just call the guys in the white coats?
- How can you help a person who lives in meta-land, who glories in beautiful dreams of a magnificent future driven by la-la land of optimism to get a KPI, benchmark a skill, and communicate with sensory specificity?

I hear this stuff all the time. Well, *all* the time is probably too general and too global(!). I hear it almost every day at the *Coaching Mastery* training, the Wealth Creation training, and some other trainings that involve detailing out specific processes to create a higher level of success. And it's never the people who can do details who ask these questions or make these defenses; it's the people who live in Never-Never Land, in the highest suburbs of Meta-Land, who do "blue-sky" stuff all day long, and those who have not seen the ground in years.

Can it be done? Is there any real hope for "blue skiers?" Can they ever come down to the green earth and plop their skybound shoes on terra firma? Is there any actual hope that dreams of Quadrant III actualize their hidden performer (Quadrant II) and synergize into a self-actualizing person (Quadrant IV).

Yes, as a recovering Global-Only person myself, I can tell you optimistically that there is hope! "Who you?" Yes, me. My default meta-program is on the global side. It was through learning NLP that I learned how to detail things and to do so to such an extent, I constantly have people tell me to my face or write it on feedback forms that I am "the most detail person they have ever met!" So how does this incredible transformation occur? What magic do we have to turn a raving Global into a calm and cool Detailer?

Detailer Magic

1) Recognize the value of detailing and especially of meta-detailing.

It all begins with the recognize and the valuing of detailing as a legitimate and important skill. If you don't recognize that, you will never be able to expand your meta-program filter. And why or how are details important? Here's some ideas that support that realization:

Mastery is in the details. What distinguishes the master from the expert and novice is his or her ability to make finer distinctions whether these are in music, art, literature, patterns, etc. Every detective also knows, The magic is in the details.

I learned this and invented the phrase of "meta-detailing" after reading Robert Dilts' works on *The Strategies of Genius.* There I learned about Walt Disney and many other geniuses and how they demonstrated the skill of meta-detailing. Later we put this in the book *Sub-Modalities Going Meta* (2007).

Details and detailing is also the very "magic" in the Meta-Model of Language, the first NLP model. It was that model that gave us the way to speak with precision and to ground experiences into specific referents which then allowed for new re-mapping thereby giving people a new lease on life.

2) Make a decision to expand your global meta-program.

Once you realize the value of details— relevant and right details to any performance of excellence, then make a decision that you will expand your meta-program and that you will detail specifics for greater precision. Will you do that? When will you make that decision? Do you have permission within yourself, with the frames in the back of your mind, to make that decision? Go ahead, raise your right hand and say the words. Good. So how is that?

3) Map out the detailing program.

Okay, with the understanding and decision in place, you are now ready to create a positive and attractive image of detailing and meta-detailing. Do you have an inner movie of what this would look and sound like? Who can you interview as a model of positive example? Do you have any old images or metaphors about details that you need to release or change or expel? Ideas about "getting lost in irrelevant details" and "wasting time with details" commonly repel people from valuing details.

4) Set frames to support your expanded detailing.

What frames of mind, frames of meaning, do you need to set in your mind that willsupport you to expand your meta-program to detailing of things? What do you need to understand, value, believe, and/or identify so that it provides you a solid framework for moving to that end of the continuum? What are the richest meanings you can give to this experience that will empower you and develop your capacity for it?

5) Develop an action plan for your practice.

Now you are ready for acting on all of this and practicing the detailing. In fact, to deliberately practice detailing. So what's your action plan? What will you experiment with? How will you review your experience so that you can get quality feedback and gain a sense of success in this?

Now to put in a plug for the experience of being on the Assist Team, almost everybody on the team comes in with some fear and trepidation about the details involved in benchmarking the specific operational behaves for the core skills of coaching. And at the same time, most of them find their skills in detailing growing exponentially in those 8 days of the coaching bootcamp and two days of team leader training. So if you are a Meta-coach and really brave, apply to be on the Assist Team and that will really challenge and expand your global meta-program.

You could also create an action plan to write out in detail (10 pages or so) your ten-year wealth creation plan. That was one of the first things I did. You could create your own benchmarking project and work on detailing out a skill or value that's important for you.

Okay, so there you have it— a process for radically altering the perceptual lens of the most extreme la-la-land over-generalized global person.

6) Set in mind the question— What am I missing? After all, you are missing things. What?

7) Representational Tracking. From words to the mental picture in your mind. Catch yourself hallucinating. "Do I know how to represent what my client is saying?"

8) Chunk Down. Representation: Specifically what kind of X? In language, use the Meta-Model as in the clarity Questions, What do you mean by *success*? Denominalize. Specify the details of the verb.

9) Eliminate limiting beliefs. "I am not a detail person." "Details are boring."

STRATEGIES FOR EFFECTIVE BENCHMARKING

- How do you learn how to *effectively* benchmark the competency of Coaching Skills?
- What is the *strategy* that the best Team Leaders among Meta-Coaches around the world use when they benchmark participants to help assess their skills and enable them to improve?
- Benchmarking meta-programs: *Match* first, then mis-match; go from global to detail; know your options and follow the procedure!

Our Criteria for effective benchmarking the coaching sessions:
Receiving:

1) *A sheet full of facts*— specific details, 2 to 5 details for every sub-skill of every skill.
2) *Clarity of writing and presenting* — able to read your writing quickly, without hesitation, and present directly and briefly.

Giving:

3) *Present succinctly* — to the point, direct, no hesitation, with an example of each skill or item.
4) *Present personally, warmly, intimately* — with rapport, with concern for the person, with focus on helping the coach become more effective. Sit next to the coach, show your benchmarking paper, point to the number of the level and the behaviors identified.
5) *Present systemically and holistically* — relate everything to the client's objective (the KPI); show the overall effect and next-step improvements.
6) *Present with confirming and validating all you can* — reinforce what worked well, "and just add more of that;" "and just eliminate those level '2' behaviors."

1) Establish your meta-frames as the Benchmarker:
Plant these questions in your mind— so they become your filters. Your questions are your filters.

- What is the skill that I am examining?
- How much of that skill is present? What is missing?
- Would I have felt X (supported/ listened/ questioned/ etc.) if it was given to me?
- What states would have been induced in me?

2) With the meta-frame in mind— move to the details.

Are the 7 core skills present? Are all of the sub-skills present?
Are *all* of the core skills present?
To what degree?
Are there enough of them? Are they *sufficient* to carry the overall skill?
Which ones are there?
Which ones are missing?
What has to be present? (Necessary)
Does the skill seem stable, regular, dependable or is it on-and-off?

3) Next, move to interferences.

Are there any opposite skills present?
What is present that interferes with the skill?
How much is some other skill present?
How much interference or static or noise does it create?
What has to be eliminated?

4) Now step back to get a sense or feel of the skill, to it's quality.

From what state does the person present the skill?
How intense or strong is that state?
What emotion comes from that state?
What is the coach's tone, speed, timing, etc. when in that state?
Is it in service of the client's outcome (KPI)?
Is it in service of the client as a person?
Does it induce the same state in the client? To what degree?

If the coach isn't in a definite state that you, as the benchmarker, can detect, then the coach's style, emotional state, mood, and tone will be weak at best. The coaches's state is diffused, mixed, conflicted, incongruous. If it is strong enough to detect, then it may be communicable to the client. That's when the *italicized* words at the top of each skill may apply.

Principles to Skills

1) Confirm what the coach is doing right; validate!

Start with level 3 behaviors; highlight them, recognize them.
Be a celebrator!

2) Give the next step.

For you to go to the next level, increase X ... in frequency, timing, etc.
Add Y (the missing ones)

3) Mention the skills / behaviors to eliminate.

"To take your skills to the next level, eliminate 0 to 1 behaviors."
Be matter-of-fact in your tone. If there's a lack of understanding about this, explain how the counter-skills undermine effective coaching.

4) Speak to the Coach's state.

What state were you in as you coached?
What are your best states for coaching?
What state, attitude, style, spirit do you ant to convey to your client?

COACHING A COACHING SESSION

Ideal for teaching how to coach and what to do at a MCF Chapter.

1) *Overview:*

Gather your team and explain an overview of the *Coaching Session Seminar* —

1) One member will coach a client.
2) All other members will benchmark 5 of the skills of coaching excellence.
3) Each member will give feedback on a skill and then receive feedback on how they gave feedback — this deals with Skills #5 and #6 receiving and giving feedback.

2) Set up:

1) 2 chairs in front for Coach and Client at an angle, check that everyone can see the coach.
2) 25 minute coaching session: *You will need a watch to keep time!*
3) Tell the team member who is coaching: "I will give you a 5 minute cue as to the end of the session. I will be your consultant if you need to stop and gather your thoughts."
4) After the session, members of the team will give feedback to the coach, each fills out the form, each one presents feedback on one skill. TL (team leader) gives feedback to each for 3 minutes about how they gave feedback.
5) *Musical Chairs:* For coach's feedback, the client will leave the chair and then each team member giving feedback will come forward, sit in that chair, and give feedback to the coach. Each person only has 3 minutes— be succinct, get to the point, make your point, give facts.
6) The TL's feedback on the giving of feedback will shape each team member's behavior about how to do so.
7) *Debriefing:* End with the following—

A) Any additional feedback for the coach? Who can you provide this person that he or she did well that has not been mentioned?
B) What can you offer that will be a next step?
C) Address the client: "What was one of the very best thing that this coach did during the session that worked really well for you?" "Okay, good. And what could this coach have said or done that would have made the coaching even better?"
D) Okay, now questions about the session, the benchmarks, or anything else?

Or, appoint a Time Keeper for the Group

Whistle at 20 (5 min to end); 25 (end) start first feedback on Skill #1; 28 (3 min. feedback from team leader, TL); 31 (Feedback #2); 33 (TL feedback); 36 (Feedback #3); 39 (TL feedback); 42 (feedback #4); 45 (TL feedback); 48 (feedback #7); (TL feedback). 51 (TL's feedback to the coach– 15 to 20 minutes. Debrief.

3) Set the frames for the Coaching Seminar process:

1) Coach to a clear objective — use the well-formed outcome questions.

2) The coach is to aim to get a KPI of the client's agenda for the coaching session.

3) The coach is to support the client by setting frames at beginning and closing effectively. Don't be caught up short when the signal to end comes.

4) Your role as a Consultant to the Coach: "I am your consultant to this coaching session; if at any time you need to stop, call time-out. I may interrupt you if you seem lost, or just to check with where you are in the process."

4) Experiential, hands-on Learning of Coaching.

Preparation: Points to drive home with your team.

1) States: Are you in the right state? Your best state when you coach? What state do you need to be in?

2) Frames: What frames will you set at the beginning? What frames will you end with?

Structure:

3) Focus: What does the client want? Ask! Ask again and again. Use the well-formed outcome questions:

Target:	What?	*Process:*	Do you know how?
	Why?		Can *you* do it?
Context:	Where?		Actions you have to do?
	When?		Plan?
	Who?		Feedback you want?

Criteria— Frames:
Resources?
Compelling? Why?
Ecological?
Evidence? How know?

A coach can't coach without an agenda! What does the client want? Have you asked? Have you checked?

4) Relationship: You first have to connect, related, get rapport to coach. Do that by supporting and listening. Enter with respect.

5) Questioning: The primary tool of coaching is questioning— exploring. Asking very personal questions. Up questions/ down questions.

6) Mirroring: Receiving feedback / giving feedback. Yes feedback happens after the session, it also happens *during* the session. Calibrate to the client and you will see it; then as coach you'll be able to mirror it back and/or confront it.

7) Experiential: Coaching is an experience, an emotional moving experience. You induce state.

5) The 7 Core skills: Each skill has multiple sub-skills — know them. Do you know them? Do you use them while you coach?

Back to basics: practice, practice, practice the basics — then you can play at higher levels.
If you discount the basics and you sabotage your competency.
The magic is in the details. That's why mastery is expertise in the critical details— the differences that make a difference.

Debriefing

After the session ask the coach and the rest of the group —
1) What have you learned from this?
2) What will you take away for your next coaching session that will make you more effective as a coach?
3) What questions do you have about the benchmarks, about the giving of feedback, and about coaching?

Part IV:

COACHING MASTERY FORMAT

The *Meta-Coaching System* is organized to integrate numerous patterns and processes that will enable participants to learn the theory, frames, and skills of Meta-Coaching more effectively. The intention of this design is to be able to effectively and efficiently train, equip and enable participants to learn and be able to *do* (perform) the requisite coaching skills so that everybody can reach competency quicker and more throughly understand the Meta-Coaching System. Doing that enables them to have more *quality* in their coaching, to be more *skilled and competent* and therefore to *be* the kind and quality of Coaches that will raise the bar and set the pace for Coaching around the world.

1) ***Process Coaching:***

To be able to think and work systemically, recognizing patterns and processes, able to not get caught-up in content. Able to see and work with the invisible structure of the coaching conversation and the processes governing the client's experience as it happens in the session.

2) ***Self-Actualization Coaching:***

To be able to see potentials in clients, awaken them, and enable the participant to go through a crucible conversation to develop and unleash those potentials.

3) ***Authentic Coaching Conversation:***

To be able to *get to the heart of things* quickly and efficiently and to work with meaning as no other coach can.

Design of the Meta-Coach System:

1) Focuses on the Facilitation Model as the heart of Meta-Coaching.

Each day there is the *facilitating* of one or more of the processes or facets of coaching. This puts the emphasis on a coach as a facilitator, and a special kind of facilitator— a coach facilitating a content-free conversation—a facilitator of the client's expertise over his or her goals and life vision.

2) Operates from a consistent theme for each day.

Each day has a theme and focus. So if a Meta-Coach wants to re-visit a particular theme or focus, he or she can return for that particular day; and can do so year after year. Also it will enable the participants to work on that theme indepth in a thorough way for an entire day. This will also save us the repetition of coming back to the theme.

3) Cumulatively builds up the Meta-Coach processes and skills.

The skills of the coach-in-training build each day becoming richer and more complex until it reaches the Certification day.

Each Day's Theme and Focus:

(Unless you are in China, Mexico, or somewhere where we do *Coaching Mastery* in two parts and using sequential translating and so are doing 10 to 14 days.)

Day 1: *Facilitating Relationship:* Creating the coaching relationship through the core skills of Supporting and Listening and Receiving Feedback. Introduction to the Facilitation Model and how to use it to create your coaching space for the conversation like none-other.

Day 2: *Facilitating Listening:* Real listening is active, not passive and given all of the things to listen for— requires a lot of focus. The 7 to 8 drills of Day 2 is designed to learn the listening skills step-by-step.

Day 3: *Facilitating Exploration:* Developing expertise in questioning and meta-questioning and giving feedback. Introduction to the invisible structures of meta-states, meta-programs, and cognitive styles and how to explore them through meta-questions as well as how to coach to meta-programs and meta-levels.

Day 4: *Facilitating Performance:* Coaching for experience, execution, and implementation via State Induction, coaching emotions, and accessing one's personal powers. Coaching clarity and precision via a KPI that synthesizes meaning and performance.

In-Between Day: for Coaching Demonstrations and Debriefings.

Day 5: *Facilitating Change:* Coaching to the Axes of Change model and developing skills as a Change Agent handling the levels and dimensions of change. Developing change skills as you learn the eight-coaching change roles for performance, developmental, and transformational change.

Day 6: *Facilitating Self-Actualization:* Coaching self-actualization in people and companies by coaching to the Self-Actualization Quadrants that enables the unleashing of potentials in individuals and organizations. Facilitate the unleashing processes that synergize meaningful performances.

Day 7: *Facilitating Your Business Development and Acumen:* Identifying your niche as a professional coach, your kind of coaching, and begin to develop the business skills so that you can work *on* your business as well as *in* it as you create a commercially viable coaching business. Create a Matrix Business Plan so you can bring out your best as an entrepreneur.

Day 8: *Facilitating Your Professionalism as a Coach:* Step up to the worldwide community of Meta-Coaches as you meet the rigorous certification requirements, and are then licensed as a Certified Meta-Coach.

TEAM LEADERS' DAILY SCHEDULE

Day 1: Facilitating Relationship

8:30 Team Leader Meeting
9:20 Introducing yourself in front of the group to the group.
What do you want the participants to know about you? Introduce your name and where you are from, some of your NLP and Neuro-Semantic experience, and the kind of coaching you do. Be warm, personable.

10:45 You will be meeting with your Team for the first time.
You have 40 minutes. You have 7 things to present. Introduce yourself to the team, take notes on what the team members say about their goals. See if you can pick up meta-programs, patterns, etc.

11:30 Facilitation Model
You get to hear the details of the first and second skills, the relationship skills: Listening and Supporting. When people do the exercises— you are the Visiting Angels popping in to listen, support, and help out. Coach them in their coaching.

1:00 Lunch: See if you can have lunch with your team.

3:00 Releasing Judgment. Watch and help people out in remembering to pace, match, listen as they do the pattern.

4:00 ***Social Panorama***. Watch for your team members and when the debrief comes, step in to participate with them.

Dinner (6:00– 7:00): We will eat together and review the day; the trainers will ask you about what happened in your team in the morning.

7:00 ***De-Contamination Pattern*****.** Make yourself available while the participants are doing the exercise. Watch and listen carefully to the demonstration so you can offer proper suggestions.

8:30 Back with your Team for Review:
Ask: What was the best thing for you in Day 1? How have you managed your state and your energy for the 12 hours? What questions do you have?
Prepare them for writing Celebrations.

Day 2: Facilitating Listening

9:00 Opening

9:20 – Listening as the critical skill in Coaching.

9:50– 10:00 DRILL #1 ACKNOWLEDGMENT DRILL #1

10:00– 10:10 DRILL #2 — ACKNOWLEDGMENT DRILL #2
Explanation

11:10– 11:25 DRILL #3 — LISTENING WITH YOUR EYES
Semantic Matching Exercise

11:30– 11:40 Drill #4 Semantic Gestures:
explanation – drill

12:00 – 12:15 DRILL #5 Clarity Check Questions
12:15– 12:35
Exercise: *Playtime with Clarity Checks:* Ask Clarity Checks on the following statements:

12:40– 12:50 DRILL #6: VALIDATION — Listening for Strengths.
Description and demonstration

2:40 — 3:15 DRILL #7 — WFO QUESTIONS
Description and explanation.
3:00– 3:20 Demonstration

3:20– 4:15 LISTENING WHEN ASKING WFO QUESTIONS
Well-Formed Outcome Questions
Coach - client and meta-person

4:30 – 5:05 — Coaching Demonstration
5:05 — Benchmarks

5:20- 6:00 Set up for Evening Sessions
The Coaching Labs. — Manual Page 40

7:00 — 9:30 Coaching Labs #1

Day 3: Facilitating Exploration

8:30 Team Leaders Meeting
You will received the Evaluation forms for Days 1-4 to give to your team members. Remind your team about the 5-Year Vision. Team 1 will do the Celebrations today.

9:00 Kinds of Questions
There will be a demonstration of the Well-Formed Outcome questions; then people will practice them. Float around to support them. Remind: pace, match, listen!

10:45 Meaning Matrix
Cognitive Meta-Programs; Cognitive Distortions

12:45 Teams: Gather your team, check on everyone's state.
Do the Introductions with the team. "My best thing from Day 1 is... My best listening and supporting state is..."

Lunch: Eat with your team — if possible.

2:00 Feedback:
One of you will be the person shooting the ball into the Basket to demonstrate as a living metaphor — the value of feedback.

3:00 Matrix for Receiving Feedback.

4:40 Coaching Session Demonstration
When the trainer or someone coaches a participant, get out your feedback forms and benchmark the session. At dinner we will compare notes.

(6:00– 7:00): Bring your feedback form that you used.

7:00 Coaching Labs
Your first session for giving feedback to the triad of participants.

9:30 Team Leaders meeting — Possibly.
Feedback on the experience of the Coaching Labs, how things went, scores, concerns about any of the participants.

Day 4: Facilitating Performance

8:30 Team Leaders Meeting

9:00 The State Matrix: Emotions; Emotional Intelligence. Inducing State skill.
Demonstration of *Coaching to Emotions*.

9:40 Energizing the Funnel
* With Intentionality.
* With the Refining Questions: Testing, checking, clarifying, and exploring.
Practice the Refining Questions Drill. Divide team into 2 sub-groups with 3 people in each. Testing, Checking, Clarifying, Exploring.

11:30 Coaching Labs
Meta-Person gives feedback on Listening.

Coaching Labs 25 — 3 min (from M-person) 3 min. /14 min. 45 each 3 rounds: 2 ½ hours — *Feedback & Scores for all 7 skills!*

Lunch: 1:00 — 2:15
2:15 Teams — 15 min. for *Introductions* "My style is..."
30 Min. For Drills Project

2:15— 2:45 **Project: Drills for Skills.**

3:00– 4:00 Coaching

4:00 *The Matrix Business Plan*:

5:30 ***5 Year Vision***

6:00 Hand in Evaluation Forms.
Collect and read in short **Team Leaders meeting**

7:00 Demonstration of Coaching to the Axes of Change — Assist Team learning the new feedback form.

Day 5: Facilitating Change

8:30 New Feedback form — will use for Days 5 and 6.
Practice and demonstration of Coaching Change.

9:00 **Change Psychology and The Axes of Change Model** (70 min.)
Kinds of Change; Levels of Change; Mechanisms.
Demonstration:

The Readiness Loop
Axis I: Motivation — Awakener and Challenger
Axis II: Decision — Prober and Provoker

10:30 **Axes of Change — on the floor**
Team Leaders — at one of the stations. You will be turning and stepping into every one of the Change Coaching Roles.
Be ready— Know the Language and the State of the Axes of Change.,
Your task: Coach the 3 or 4 people who join you on how to speak and feel that Change Role.

11:30– 1:30 **Coaching Labs**

Coaching Labs— * *Coaching to Readiness*
25 — 3 min (from M-person) 3 min. /14 min. 45 each
3 rounds: 2 ½ hours

Lunch (1:30 – 2:30)
2:30 — 30 minutes for Drills Project
3:00 — 15 min. for Identity
3:15 ***Coaching Practice***

4:05 Break
4:20 **Debrief on Coaching Change.**

Evening Dinner (6:00– 7:00)
Team Leaders – dinner together.

7:00 **Expanding Meta-Programs**
7:40 **Video: Graham DVD**
8:00 Presentation: Drills for Skills

Day 6: Facilitating Self-Actualization

8:30 Team Leaders Meeting
When you are with your team today: "My market is... " "My offering is..."

9:00 Self-Actualization Psychology
History, origin of the model; the secret history of NLP. Hierarchy, Quadrants.

10:45 Teams: Team leaders lead questions and discussion for 30 min. bring back 2 questions.

11:15– Power Matrix
Responsibility To/ For pattern

12:00 Coaching Demonstration (video-tape it) **! ** If there is no In-Between Day for Coaching Demonstrations**
Session to demonstrate using the 7 core coaching skills
and the Axis of Change with a participant.
Film and have available for viewing on evening of Day 6**.**
Team Leaders – use to practice your feedback / benchmarking.

1:00 Lunch
2:00 15 min. Identity
2:15 30 min. Project

3:00 to 6:00

Coaching Labs
35 — 3 min (from M-person) 3 min. 14 min. 55 each
3 rounds: 3 hours

Evening Dinner (6:00– 7:00)

7:00 ***View Film*** — and Debrief

Team Leaders Meeting

Day 7: Facilitating Coaching Business

8:30 Team Leaders meeting

Need to complete the Pre-Certification Records today.
Sign all Certificates also.

9:00 The World of Business —

Kinds of Coaching

Personal Coaching — Introduction Session
Executive Coaching
Internal Coaching
Business Coaching
Group & Team Coaching

10:45 In New Teams — Kinds of Coaching Teams

Team Leaders in charge – lead, answer questions, bring back 2 questions.

12:45 Teams:

Identity: My market and offering is..."

1:00 Lunch

2:00 Comedy Skill practice
2:30 Introductions
2:45 Huddle with Team — what will you work on in this last Coaching practice?

Coaching Labs

25 — 3 min (from M-person) 3 min. /14 min. 45 each
3 rounds: 2 ½ hours

5:30 Debrief Coaching Skills

Evening Dinner (6:00– 7:00)

7:00 Business Intelligence

Possibly: Panel

8:00 Comedy Skits

Day 8: Facilitating Certification

8:30 Team Leaders Meeting

9:00 Time Matrix

10:00 **Meta-Coaching — history and future** (60 min)

11:30 Teams

Feedback to team leaders (30 or 40 minutes)

Reflection on the group and team processes and how you operated as a group.

Feedback to the Team Leaders

Feedback about being a leader and group coach. Use questions in Team Leaders Manual.

Lunch (1:00– 2:00)

2:00: The Test — ACMC Qualification test and assessment

Team leaders will be a part of the new teams created for the test and can help out the participants.

3:00 Meta-Coach Foundation and Licensing (1 hour)

Contract as a Meta-Coach
Ethics
Licensing Agreement: MCF chapters

4:00 Speaking from the Heart

4:30 Preparation of Room for the Graduation

Team leaders prepare the room — then with Trainers for Feedback
Time for Participants to prepare their introductions.
Dress rehearsal for the format.

7:00 – 9:00 Graduation

Team Leaders give their "Inspiration" moment.

REVIEW AND FEEDBACK ON DAY 8

On the last day you will have 30 to 40 minutes with your team to review "group coaching processes" in the larger group and in your small group. This will enable you to help everybody reflect on the group coaching that went on in both places throughout the week. Then you will have 30 to 40 minutes for feedback for you as a Coach and as a Leader. The following are questions for that.

Group and Team Coaching: Using the forming, storming, norming, and performing stages of a group's development, invite the group to think through the group process coaching skills that enabled them to move from being a group to a team.

1) Did we move from being a group of people to a team? To what extent? How successful were we in doing that?
2) How did that work (*or not work*)? What processes enabled us to become a team?
3) What did you bring to the team that helped? Your gifts, strengths, etc.?
4) What did you bring to the group that challenged us?
5) What have you learned about being a team-player and helping a group become a team?
6) Where would you rate yourself on being a good team member? Team player? 0 to 10. Why? Would everybody agree with that?
7) Those of you who are leaders, how challenging was the group experience for you?

Criteria for an effective Team and team leading/ coaching:

1) *Cohesiveness.* Create a cohesive team: build up a consensus of your people.

2) *Facilitation:* Facilitate the group processes without doing them for them and without instructing them about how to do them. It's not about teaching and training, about giving advice, it is about *coaching* them as a group so they become a team.

3) *Engagement:* Actively involved in coaching and giving feedback. Confronting what's happening and empowering the group to deal with it.

4) *Punctuality:* Being punctual. You are responsible for keeping the time. When you hear that you have 15 minutes in your groups, mark your watch and get the group back on time. Coach the group to handle its tasks in a timely manner.

5) *Healthy Self-Care:* Take care of yourself. Get the rest and food that you need that will enable you to be a good model of a well-balanced coach. This will be a very intense week and you will be putting in extremely long hours.

6) *Fun and joy:* Coach the team so that they have lots of fun and massive pleasure in the process. If you get serious, you will get stupid. If your team gets serious, the team will get stupid.

7) *Effectiveness:* You will be evaluated for how well your team performs, coach your group to become a high performing team. Group activities: daily Introductions, Benchmarking an intangible.

Team Leader Feedback: The second part is for the team leader to receive feedback from the group.

What worked well? What skills were successful? What would take my skills as a group coach to the next level?

Be sure to get someone to be a scribe for you and record the information you are given. What is said and by whom?

1) How did I (or we) do as Team Leaders? In terms of Coaching the team and Leading the Team, what did I do well?
2) What would take my skills to the next level? What would be a stretch that you can offer?
3) Anything else that would enable me to be a better team coach and/or a leader?

Part V:

.. EFFECTIVE TEAM LEADERS BENCHMARKS

Executive Description:

Geoff Dowell initiated the following benchmarking of what consists of an effective Assist Team. He took this on as a project during the June 2005 London ACMC Certification coaching. We have expanded and extended what Geoff began and together we have continued to refine this list to make more explicit our understandings of benchmarking out own skills as working together as leaders and as a team.

The following seeks to *identify* and *quantify* the actual behaviors that make up the particular *skills* that are entailed in effectively being a small group leader and part of the faculty for *the Meta-Coach Training System.*

As a working document about a development-in-process that will continue to grow and evolve with each training, this is just the beginning.

Essential Assist Team Skills:	**Intentions**
1) Demonstrating meta-coaching skills	Being a good role model of coaching
2) Observing and interacting with participants	Being present and interactive
3) Benchmarking coaching skills	Skillfully benchmarking with precision
4) Collaborating as a team member	Collaborative in attitude and action
5) Leading and coaching a team	Active in leadership
6) Evaluating self performance	Self-aware in continuous improvement
7) Assuming responsibility for self	Responsible and accountable
8) Confronts difficulties quickly and effectively.	Forthright, ready to work out conflicts

1) Demonstrating Meta-Coaching Skills

Definition: Actively and congruently demonstrating the demeanor and methodology of coaching by using the seven core coaching skills (listening, supporting, questioning, meta-questions, giving and receiving feedback, and inducing state) in everyday communicating and relating.

3.5 Conversationally facilitates participant learning elegantly and naturally in such a way that they comment on the presence of meta-coaching skills.
Facilitates participants, challenges complaints and learning while demonstrating meta-coaching skills.
Congruently displays emotional responses as exemplar of effective "apply to self" of the tools.
Intervenes with participants in asking questions, checking state, inviting awareness of process and holding accountable for words and behaviors.
Shares relevant examples of own business experience when asked.
Elicits meta-state / meta-program profiles of individuals, coaches to them to gain rapport.
Sets own outcomes and evaluates own efficacy in regular feedback reviews.

3 In most interactions uses facilitation and feedback style to communicate and relate.
Validates participants by acknowledging, reinforcing successes.
Accepts participant's level of knowledge and skills, welcomes errors and mistakes as opportunity to learn.
Emotionally stable as seen in even-handed approach with participants even in face of positive or negative provocation.
Says "I don't know," Treats mistakes and errors as normal.
Intervenes at times asking awareness questions, e.g. "Where are you now?"
Uses review, reflection and evaluation to assist participants.

2 Facilitates with participants some of the time; gives advice or teaches at times.
Exhibits emotional self-control most of the time and responds appropriately if sometimes reactively to provocation.
Bluffs knowledge or experience, will not say "I don't know."
Denies messing up, blames others.
Incongruent (e.g., hesitant, stammering) when asked about one's coaching practice.

1 Only seldom uses facilitation and feedback style of interaction.
Gives small amounts of advice without framing as mentoring.
Occasionally goes into unresourceful states getting aggressive, defensive when questioned.
Brags or defensively declines to comment on the efficacy or details of own coaching business.

0 Gives opinions and judgements without behavioral details.
Talks and teaches quoting his or her superior status or rank.
Interrupts to offer advice and anecdotes.
Only makes statements rather than asks questions.
Goes into unresourceful states with participants.
Gives more attention (time, conversation, etc.) to some participants.
Refers to others not present as bad examples of desired skill.

2) Observing and interacting with participants

Definition:

Observing how participants are doing in the training and stepping in to engage, to assist participants in learning and succeeding at the pre-defined activities against agreed criteria for measurable outcomes.

3.5 Gives feedback in the moment of what works and what does not work.
Spend 100% of time in observation and reflection with participants
Steps in often to ask process questions: Where are you? What are you looking for?
Reinforcing what's working well with validation statements and questions.
Asking some testing questions.

3 Spending lots of time with participants in practice sessions.
Watching how participants are doing and being seen as witnessing them.
Communicating silently with face and gestures of one's presence.
Taking notes about observations.
Able to report specifics about what went on in practice session to Assist Team.
Speaking to participants about what was seen and heard.
Stepping in at times to ask reflective questions.
Gives feedback score.

2 Steps in only a few times, misses key moments when presence could have made a difference.
Not using face or non-verbals to communicate one's presence, somber look, non-expressive.

1 Having to be told to join in, watch and interact.
Doodling and reading instead of actively scanning group.
Unable to describe events to the Assist Team.

0 Not present for participant's activities and practice sessions
Not engaged in looking and speaking with participants.
Avoiding groups, keeping to oneself.

3) Benchmarking the coaching skills of participants on the Core Coaching Skills

Definition:

Observing the performance of participants in a training exercise with a view to giving feedback against defined performance criteria that leads to self-evaluation, corrective action, performance improvement, and personal insight.

3.5 Acknowledging what coach did well.
Tasking for taking skills to next level.
Induces states of excitement about receiving feedback.
Checking with coach on response, "How does this fit what you perceived?"
Asking, "What will you take away from this?"

3 Acquaintance with benchmark criteria, demonstrated by speed at tracking.
Quickly sees/hears cues and registers them on form.
Writes notes of statements of the coach.
Summarizes details to the coach.
Tracks statements and non-verbals of patterns detected
Feedback in sensory behavioral terms.

2 Fumbling with papers as trying to track behaviors and words.
Few or no exact behaviors, words, or speech patterns written down.
No checking in giving the feedback about response.

1 Giving evaluations but no behaviors in reflection.
Making general statements with no specific examples.

0 No mention of the benchmark numbers or behaviors that indicate a given number.
Distracted in doing things other than benchmarking (looking at other groups, talking to Assist Team, etc.).

4) Collaborating as a team member.

Definition:

Working as a member of the leadership team, pro-actively seeking to work and connect with the others to achieve agreed-upon training outcomes for everybody, namely, to offer the teams as support groups for participants, to support the trainers and experts.

3.5 Regularly monitors the team and individuals to check on level of collaboration.
Speaks about cooperation and reminds others of the importance of collaborating.
Acts with autonomy while checking with others at times.
Inquires about the "bigger picture" of the training as ultimate criteria.
Speaks clearly and succinctly in the Assist Team group meeting.
Validates team members in discussion (pacing, matching).
Gives concise, constructive and sensory specific feedback.
Takes initiative to ensure tasks are completed on time.
Validation of understanding after communication exchange.
Works flexibly to accommodate short notice changes to plans and commitments and covers for other team members.
Facilitates problem solving from complaints from self and others for self-management and positive resolution.

3 Asks questions about how to facilitate and enhance training outcomes.
Follows instructions from Team Director and Trainers with cooperative attitude as evidenced by looking for sameness, asking, "Does this fit?"
Talks and makes choices using "we" as criteria over "I."
Speaks up for own team role asking if commitments are being honored.
Communicates information to others and gets information and services as agreed.
Communicates unresolved errors / omissions and complaints in the training review process.

2 Fails at times to fully honor commitments to team members or participants.
Uses "I" more consistently than "we" when making choices between self and the group.
Cannot describe group skills that contribute to overall training.
Late for Assist Team meetings.
Fails to manage time with one's group.
Complains about omissions and errors in logistics.
Encourages and validates complaints from others without facilitating self-management.
Does not complete assigned logistical tasks.

1 No words or questions indicating seeking to work with other team members.
Explains self and choices without reference to the team leader, trainers, or the training.
Leaves training room or doesn't show up without checking with Team Director.

0 Refuses to accept responsibilities and limitations of being part of the assist team.
Pursues own agenda during training without acknowledging consequences to others.
Avoids contact and discussion.
Offers no contribution of ideas, insights, suggestions.
Uses "I" constantly and never "we."
No questions of exploration with the group.

5) Leading and coaching a team.

Definition:

Communicates a vision that compels a group of individuals to act cohesively as a team to support and enhance the learning experiences of the training participants, to transform the group into a *team* that works well together and achieves assignments.

3.75 Team fully completes tasks as set by Trainers (e.g., group benchmarking)
Communicates a compelling vision of team performance.
Sets all necessary pre-frames. Negotiates outcomes before training starts.
Facilitates the development of a collective intention and key operating principles.
Coaches the identity of a team in relation to tasks and time.
Regularly reviews team performance against benchmarks.
Offers to coach individuals and the team for improvement in effectiveness.
Leaves space for others to lead when their knowledge and skills are appropriate.
Reviews the overall progress of the team and training with trainers to determine corrective actions.
Fully congruent as evidenced by confidence in voice and posture in role as team leader.
Seeks permission to lead and commitment to follow.
Focuses on what needs to be done, allows the *how to* do it to be developed by group.
Celebrates team performance after the event and evaluates effectiveness in relation to training outcomes and feedback from participants for learning.
Updates frames as required to manage the expectations of the group.
Keeps track of tasks and activities of the group.
Challenges inappropriate behavior to hold individuals accountable.

3 Identifies self as the Team Leader, allocates team roles.
Communicates clearly and concisely the purpose of the group tasks, etc., invites discussion.
Steps in and out of the roles of working "in" the team and working "on" the team.
Asks questions that activate the group to create its own strategies for cohesive activity.
Asks, "What happened and why?" to hold individuals accountable for their actions.
Devotes similar account of time and talk to group's tasks and relationships.
Gets involved with tasks and responds flexibly to cover unavoidable resource gaps.
Keeps team and tasks to agreed times.

2 Incongruent in voice and posture, hesitant in taking lead role or organizing activities & time.
Provides no rules, or imposes unclear and unreasonable rules without consulting the group.
Focused on tasks at the expense of relationships by pushing people without validations.
Inflexible in responses, dogmatic in style, leaving little room for development.

1 Talks about self and one's role with serious tone, facial expressions, no humor in voice.
Socializes too much or too little so team tasks are not completed.
Speaks of no vision for the group to become a team.
Holds back from setting frames with the group.

0 Falls into unresourceful state (e.g., tears, silence, anger) when something does not go well (Lacks the ego-strength to lead)
Talks more about one's own agenda than the team's.

6) Evaluating self performance

Definition:

Identifying the specific behaviors with clearly stated KPIs, pursuing those actions and then evaluating one's effectiveness and appropriateness and the interventions in relation to stated intentions and outcomes for the training.

3.5 Can identify own and others' perceptions of one's own behavior generally and against set criteria.
Easily expresses strengths, growth areas when asked about performance.
Uses checklists on daily basis for self-evaluation.
Continually returns to a single context (e.g., to benchmark more effectively) to hold self accountable to goals.

3 Clearly specifies one's intentions and outcomes in self-development.
Uses criteria list to measure success for oneself.
Checks with others about one's evaluations for reality testing.
Writes out sensory-based behaviors to work on.
Asks for coaching, insights, feedback, and ideas from colleagues for self-goals.

2 Speaks in universals (all, always, never, no one) when comparing one's effectiveness of actions.
While person can identify time spent in self-evaluation, the time is minimal.
Has no list of stretch goals and criteria for measuring progress.
Needs significant time to answer questions about self awareness and behavior.

1 Compares self with others, seeks to improve by emulating them.
When asked, "How do you evaluate your performance about X?" says, "I don't know."
Or, over-evaluates and over-rates one's skills. Refuses to be benchmarked on the skill.

0 Refuses to receive sensory feedback about effectiveness of own actions or interventions.
When asked, "how do you evaluate your performance about X?" says, "I have not even thought about that."
Consistently excludes everybody else's performance without externalizing self-awareness of own behavior.

7) Assuming responsibility for self

Definition:

The state of mind-and-emotion of identifying and owning one's responses, and acting in accordance by using "I" language, refusing making statements of judgments of others, distinguishing responses for self and to others.
— Asks about what happened, when, where, with who, etc.
— Asks in curious tone, matter-of-fact voice.
— Offers no statements of explaining the cause or why of the behavior.
— Asks questions about statements of "excuse."

3.5 Quickly assumes full responsibility for self, saying, "I did X and it went astray."
Looks for feedback, insights, ideas; asks for coaching.
Seeks out from others feedback about actions, successful and unsuccessful.
Refuses to let someone else make excuses for oneself.
Talks about responsibility for self and to others, asking about where the line is.

3 When speaking about actions and behaviors generated from within oneself, uses "I."
When faced with something not working well, asks about one's own actions.
Explores with questions, when, where, what, which, etc. to obtain details of actions.
Asks questions about consequences of actions, effect on others.
Asks questions about your response or another's.

2 Engages in lengthy explanations about "why" things didn't work out.
Speaks about shame, embarrassment, guilt, feeling bad when talking about such.
Lowers head, mumbles, acts in ways to placate or to play the victim.

1 When aware of one's actions and consequences that failed, shifts subject.
Blames others, circumstances, situations for failed actions.

0 No questions or exploration about one's own actions.
Accuses others, judges, uses mind-reading statements about others.
Uses cause-effect statements placing "cause" outside oneself for one's own actions.

8) Confronts difficulties quickly and effectively.

Definition:

Identifies difficulties, challenges, and problems that arise and addresses them directly with the person or persons involved in kind, calm, and focused way, clearly distinguishing responsibility to and for, creating safety for the others, separating person and behavior, and focusing on solutions for the future.

3.5 Spends abundant time pacing the state of everyone concerned before initiating the talk.
Asking about how safe the other or others feel, making adjustments for safety.
Sets frames about the confrontation to make it a positive experience aimed for the benefit of everyone.
Inquires about context and setting to make sure it is supportive for all.
Saying words about one's own fallibility, possibility of having it wrong.

3 Brings up unpleasant and "sensitive" subjects in calm and objective manner.
Asks permission to bring the subject up.
Inquires of others if they want to talk about it, if they are in the right state to talk.
Frames that the talk is about behavior, not person.
Presents issue directly and succinctly using sensory specific language asking for the other's perspective on it.

2 Brings up subject but doesn't ask permission or check state of others.
Starts calmly and with sensory specific language but slides into stress judgments and evaluations.

1 Starting in resourceful state, but quickly gets into an angry or aggressive state, sharp tone, etc.
Using "you" language and making assertions without any question of their validity.
Using exaggerations, mind-reading, emotionalizing, "should-ing" language.

0 Talking in anger, stressed, frustration state and not shifting.
No inquiry about the other, jumping in with the confrontation.
Speaking in harsh tone, quickly, breathing hard.
Avoiding, pretending, refusing to deal with the issue.
Putting it off, letting it brew.
